

Bangalore, the visually impaired students, graduates, working professionals and others are becoming Computer literate.

Computer literacy is giving them new professional opportunities, and enhancing their status at their present jobs, also giving them additional proficiency and confidence at work.

Preeti Singh, visually impaired computer trainer, at our Computer Centre, after having undergone training here with us, now steps out into the tough, competitive world of Consumer Marketing.

The Managing Director of Granny's — a fast growing non-durable consumer products company, on observing Preeti's competence and confidence at the computer, and her handling of her students, offered her employment as Marketing Manager at Granny's.

With her computer related skills, Preeti will independently handle all her paper oriented marketing requirements. At a later stage she will also be participating in the development

of special consumer programmes which will give the industrialists or the 'sellers' complete information on the 'buyers'.

All of us at NAB join in wishing her the best in her new career.

## In Memory of Monica Sood.....

In fond memory of Monica Sood, a brilliant all-rounder, loved by all of us here, we planted a jamun sapling in the school compound. The children have named the sapling 'Monica'

## Pallak Seth

Pallak Seth, a student of Modern School, parts with his pocket money for buying reading material and 'goodies' for his friends at NAB. On the occasion of flag day, 14th September 94, he generated Rs 5000/-
